Recommendation of Global Land Services, Inc.,

As lead project engineer for Enbridge Energy during the construction of Stage 2 of the Southern Access/Southern Lights Pipeline, I worked closely with Global Land Services, Inc. They were responsible for the construction staking, creek profiling, environmental mapping and as-built surveying of 68 miles of the parallel oil pipelines. Global's staff was eager and available to assist me and my office during the construction process and provided a professional staff to deliver quality surveying services. I found Global's management and field staff to be forthright and willing to adjust to the changing conditions of the project as it developed. Global was able to mobilize sufficient staff to meet the needs of the project and delivered what was asked of them. Rodney Wolf and his staff demonstrated the thorough knowledge of the surveying field that I know will serve them well in their future endeavors. If you have any questions about Global's performance please contact me.

Sincerely,

A handwritten signature in cursive script that reads "Arthur G. Grell".
