To whom it concerns,

I would like to commend Global Land Services, Inc. for the job they recently completed on the Pacific Connector Gas Pipeline project. The progress made for 137 miles through the extremely rough terrain and thick vegetation was exceptional, meeting a schedule that was aggressive to say the least. All of the survey teams provided were easy to work with and professional. The supervision and crews that GLS supplied for the project made life on the job easy and enjoyable for us. Because GLS worked closely with the land department, land owners and outside agencies things went very well. All of the field data collected and the finished data provided was in perfect order and easy to use. I would like to express my appreciation to Rodney Wolf and Robert Sanchez for the personal attention and effort they all gave to our project. I would welcome back the Global Land Services Inc. team any time, and do look forward to a long continued working relationship with them.

A handwritten signature in black ink, appearing to read "R. Owings", is written over a horizontal line.
